20160502.Release

Short Manual for reconfigure **AndroidStudioProjects/MediaPlayerSDKTest**

1. Create new folder:
   20160502.Release/src/AndroidStudioProjects/MediaPlayerSDKTest/app/src/main/jniLibs

2. Copy three folders armeabi, armeabi-v7a, x86 from 20160502.Release/libs to
   20160502.Release/src/AndroidStudioProjects/MediaPlayerSDKTest/app/src/main/jniLibs

3. Create new folder:
   20160502.Release/src/AndroidStudioProjects/MediaPlayerSDKTest/app/libs

4. Copy mediaplayersdk.jar, org.apache.http.legacy.jar files from 20160502.Release/libs to
   20160502.Release/src/AndroidStudioProjects/MediaPlayerSDKTest/app/libs

5. Replace src/AndroidStudioProjects/MediaPlayerSDKTest/app/build.gradle to this:

```
apply plugin: 'com.android.application'

android {
    compileSdkVersion 23
    buildToolsVersion "23.0.3"

    buildTypes {
        debug {
            minifyEnabled false
        }
        release {
            minifyEnabled false
            proguardFiles getDefaultProguardFile('proguard-android.txt'),
'proguard-rules.pro'
        }
    }
}

dependencies {
    compile files('libs/mediaplayersdk.jar')
    compile files('libs/org.apache.http.legacy.jar')
}
```

Now just open this poject in Android studio

After run application (*First link could not be work*):
Please select other URLs.
